Banking Database Management System   **2021**

Name: Nitin Gangurde   Reg. No.: 2019BCS113

Title of Project: BANKING DATABASE MANAGEMENT SYSTEM

Need Statement:

**The "Banking Database Management System" project is a model
Internet Banking Site. This site enables the customers to
Perform the basic banking transactions by sitting at their office or at
homes through PC or laptop. The system provides the
access to the customer to create an account, deposit/withdraw the
cash from his account, also to view reports of all accounts
present. The customers can access the banks website for viewing their
Account details and perform the transactions on account
as per their requirements. With Internet Banking, the brick and
mortar structure of the traditional banking gets converted into a
click and portal model, thereby giving a concept of virtual banking a
real shape. Thus today's banking is no
longer confined to branches. E-banking facilitates banking
transactions by customers round the clock globally.**
